Cycling and walking

[Print](#) 

We're making it easier to include healthy active transport options, like bike-riding, scooting and walking, on your journey.

[Find bike-riding maps for your local area.](#)

Active transport benefits

- **Health:** It's a convenient and practical way to incorporate regular exercise into your day.
- **Environment:** Bike-riding, scooting or walking to your stop or station helps to reduce your carbon footprint.
- **Economic:** The cost of buying and maintaining a bicycle is around 1% of the cost of buying and maintaining a car.
- **Social:** It provides an opportunity to socialise with people in your local community.
- **Transport:** Bike-riding provides customers with economical and efficient access to public transport services. On average, 10 times more households are within riding distance of public transport than they are within walking distance.

Travelling with a bike or scooter

There are a number of rules around travelling with bikes and scooters on our network, depending upon which type of public transport you are using.

Bikes and [personal mobility devices](#), including e-scooters, are not permitted on bus or tram services.

Folding bikes and kick scooters

If your folding bike can be carried in a bag no bigger than 90cm x 70cm x 36cm, you can travel on any service.

Kick scooters can be taken on-board any service. If you're travelling by bus, fold your kick scooter down (where possible) and store it in the luggage racks. Please take care to not block the aisle or doors.

Train travel

Making it easier to include active transport options in your journey, you can travel with your bike or personal e-scooter onboard trains at any time.

When travelling with a bike or e-scooter, you need to:

- board using the first or last carriages of six-car trains only
- ensure only two people with bikes or e-scooters are in the first or last carriage at any time, or wait for another train
- keep clear of access to priority seating
- keep your bike or e-scooter clear of aisles and doorways
- stay with your bike or e-scooter at all times.

If there is not enough space available, you may be asked to catch another service. Please follow the direction of staff.

Note: Bikes and [personal mobility devices](#), including e-scooters, are not permitted on railbuses.

CityCat and ferry travel

Bikes, scooters (including e-scooters) and other personal mobility devices are permitted on CityCat and ferry services subject to space availability and staff discretion. Please take extra care to avoid inconvenience to other passengers.

When travelling please remember:

- all wheeled devices (other than motorised mobility aids) must be walked onto the ferry.
- to not block aisles or allocated priority spacing.
- Devices must meet the [Commonwealth government's Disability Standards for Accessible Public Transport 2002 \(Transport Standards\)](#) in terms of dimensions, weight, and manoeuvrability.

Bike and scooter facilities

Bike facilities offer greater flexibility as you can ride or scoot to a station and securely park your bike/scooter before continuing your journey on public transport.

We offer a number of bike racks and facilities for public use at bus stations and park 'n' rides.

[Queensland Rail](#), [Brisbane City Council](#) and the [City of Gold Coast](#) also offer a number of bicycle storage facilities across our network.

Find your nearest bike rack or facility below.

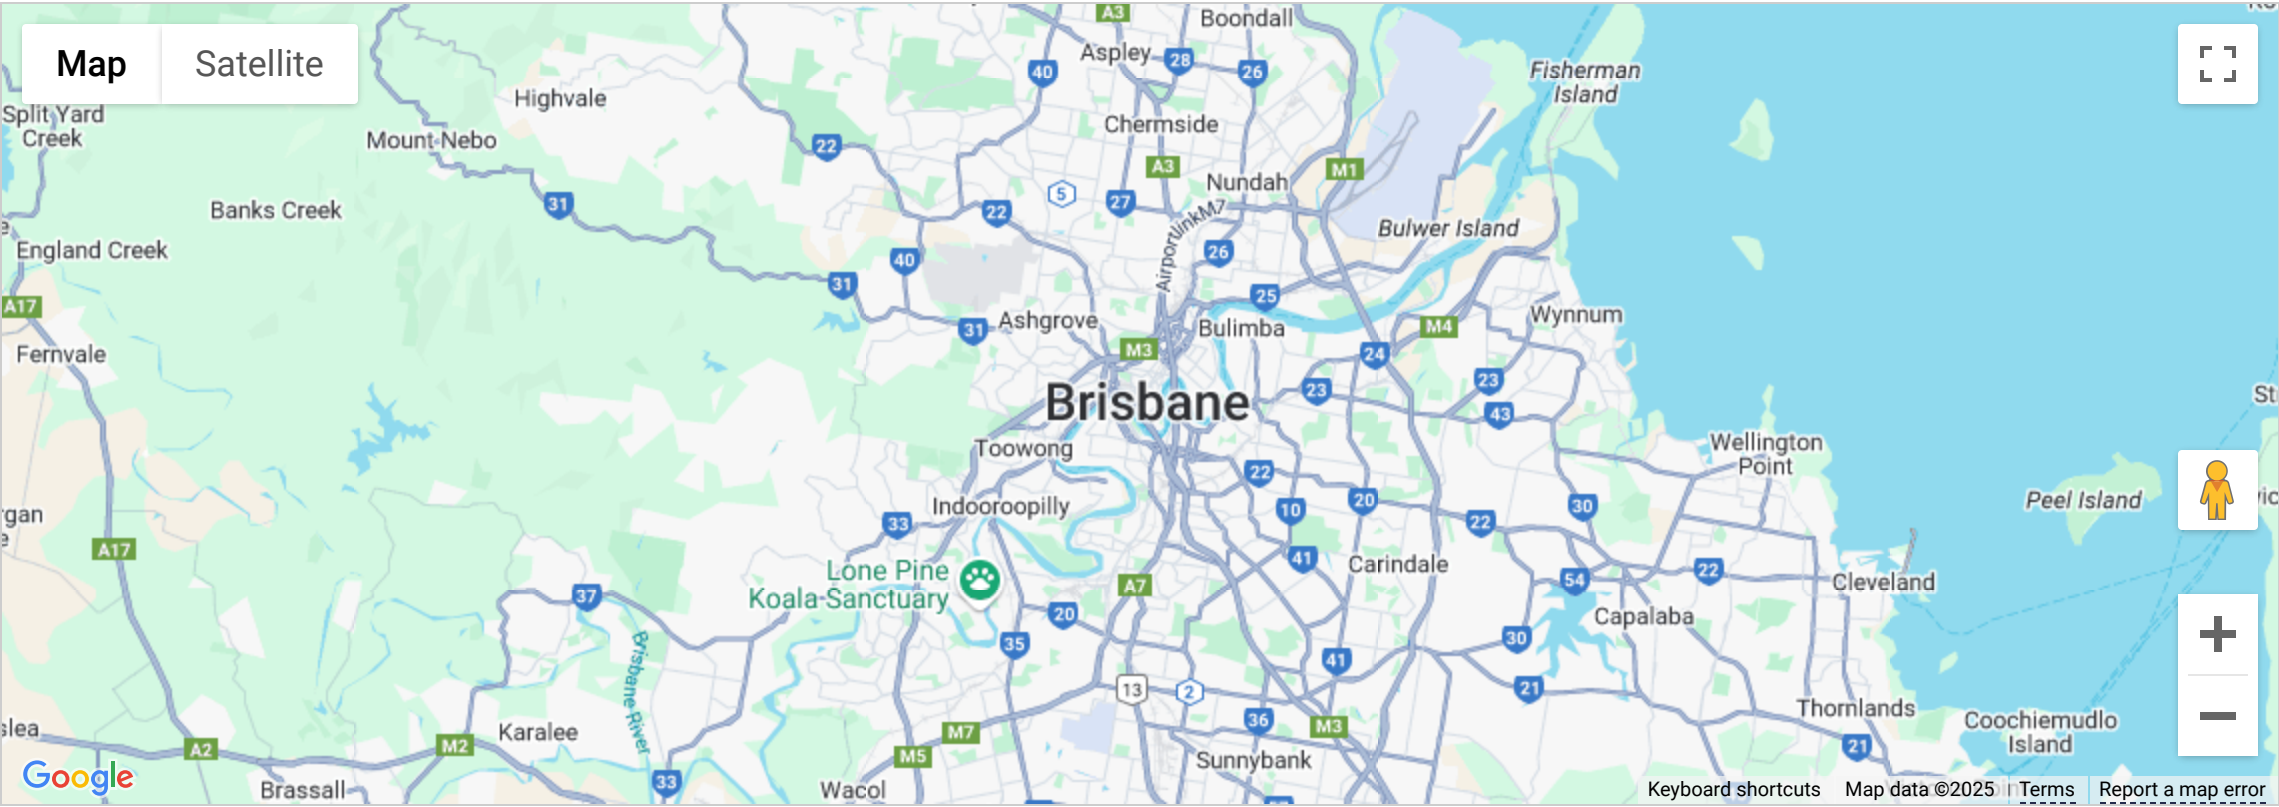

An [area for shared e-scooter and e-bike parking](#) is also available at [Greenslopes](#) and [Holland Park West](#) stations.

Book a bike locker

To use our bike facilities, email us at bikelockerqueries@translink.com.au.
