Easier bus stop information with NFC

Print 🖨

Translink NFC bus stop case

Using NFC (Near Field Communication) at bus stops is an easy way to access reliable, up-to-date bus stop information without needing to search the web.

NFC is easy to use. Simply tap an NFC enabled* smartphone on the NFC case to view information about your specific stop, including:

- stop timetable
- real-time information, where available
- service notifications
- general stop information.

How to use NFC

Watch our step-by-step instruction videos for Android and iPhone:

iPhone guide

Android guide

*NFC is available on most modern smart phones and wearable devices. Android users can enable NFC in their device settings. Apple devices have some variation in NFC compatibility. NFC is available for iPhone 7 and subsequent models. To enable NFC on iPhone models 7, 7 Plus, 8, 8 Plus, X and X Max, a third-party NFC reader app is required. There are a number of NFC reader apps available through the app store.
